**Subject:** dukes conservation district survey

Tim;

I am chair of the District that basically oversees the activities of the USDA Natural Resource Conservation Service (the former soil conservation service) and we are in process of revising their work program priorities to better reflect what the local residents want.

I would like to request that the town board employees as well as the elected or appointed board members take the survey. I wonder if you would forward this email to the board contacts and ask them to distribute the link to the survey by the easiest means possible- forwarding this email to the board members probably.

Thanks,

Bill Wilcox

Survey link is:
