Hi all,

Here's what's happening so far as follow up to the Dec. 3 Squibnocket presentation:

1. Reid Silva, PE, PLS will submit a proposal and fee request to evaluate the current plan—sort of an environmental impact study. He will do this jointly with a very good coastal geology expert and consultant from Woods Hole Oceanographic Group.
2. Reid and Mark Haley (Squib. Farm Homeowner's Assoc. engineer) will organize all of the relevant FEMA, Hurricane and costal erosion data for analysis.
3. Jo-Ann Taylor, M.A. Geology and MVC Coastal Planner will evaluate the plan as well @ no charge—because the Town already pays for this service.
4. I'm working on getting construction specs. for the Town's portion to help get rough cost estimates for budgeting purposes.
5. I am on the Planning Board's Dec. 9<sup>th</sup> agenda to discuss how the zoning bylaws apply to the current proposal.
6. I am registered and planning to participate in a Hurricane Sandy remediation grant webinar on Dec. 17 to learn how to apply for a grant from the National Fish & Wildlife Foundation to possibly help pay for the revetment removal and beach nourishment. The application deadline is January 31, 2014.
7. I am working on a rough outline and follow up presentation # 2 to fill in all these blanks and more.

Chuck
