

JOHN R. SMITH

Dr. John R. Smith, Ph.D., P.E., has 40+ years experience in the civil, environmental and chemical engineering fields and is currently a partner with Corporate Environmental Solutions (CES) LLC (<http://www.solutions-by-ces.com/>). CES is an environmental consulting company comprised of highly experienced environmental professionals who use their expertise to develop innovative, yet practical solutions for the environmental needs of their clients. Prior to joining CES, Dr. Smith was employed by Alcoa, Inc. as Director of Sustainable Technologies where his responsibilities included providing leadership, guidance and direction in the development, early application and commercialization of innovative and energy efficient sustainable technologies worldwide.

Dr. Smith holds a BS in Forest Engineering from the State University of New York College of Environmental Science & Forestry, a BS and MS in Civil/Environmental Engineering from the State University of New York at Buffalo, and a Ph.D. in Civil/Environmental Engineering from Carnegie-Mellon University, where he also serves as an Adjunct Professor. He holds ten patents and has served on various committees of the US EPA and the National Academies.
